## 1. Abstract and Executive Summary

**CoinReward (CORE)** is a non-transferable utility token engineered to provide exclusive access to a sophisticated entrepreneurial ecosystem for **unserved businesses and individuals**. CORE serves as a functional **Identity Key** on the Solana infrastructure and acts as a **consumable "gas" credit** required to activate the **Entrepreneurial Utility Suite**—including Sponsorship, Professional Representation, and the \$200,000 USD Line of Capital. While a single unit of the token serves as a permanent **Soulbound Identity Key**, any balance above this threshold is consumed as "gas" to fuel the legal onboarding and administrative activation of the suite.

---

## 2. Tokenomics & Distribution

*Derived from official project documentation.*

- *Picture:*

- **Official Name:** CoinReward
- **Ticker:** CORE
- **Contribution Parity:** 1 BOIN = 1 CORE (via Atomic Barter)
- **Contribution Parity for Contribution / Donations:** 1USDC: 1CORE
- **Barter/Swap Policy:** 1 CoinReward : 2 Bondibill
- **Transferability:** Non-Transferable (Soulbound).
- **Token Standard:** Solana Token-2022 standard (with a specific **Non-Transferable (Soulbound)** extension).
- **Hardware Wallet Compatibility:** CORE is compatible with major physical hardware wallets via the Solana ecosystem. Because CORE is Soulbound, users **MUST** execute the initial BOIN-to-CORE barter using their hardware wallet address to ensure their permanent "Identity Key" is stored in cold storage. Manual release recipients must provide a secure, permanent Solana address, as these tokens are Soulbound upon minting and cannot be moved to a different wallet later.
- **Utility Classification:** CORE functions as a "Refuelable Consumable Utility Credit", "Identity Key" for access to Entrepreneurial Utility Suite, while maintaining a "Permanent Soulbound Key" state at the 1-unit threshold.
- **Total Supply:** 5,800,000 Fixed (Mint-on-demand)

- **Allocation Breakdown:**
  - **5,000,000 CORE (86.2%):** Reserved exclusively for the **Atomic Barter** (1 BOIN : 1 CORE). This ensures that the primary gateway for access Entrepreneurial Utility Suite remains decentralized and automated.
  - **800,000 CORE (13.8%):** Designated as "**Donation-Based Manual Release.**" These tokens serve as a "Digital Contribution Receipt" for contributions and provide access to the Entrepreneurial Utility Suite (including \$200,000 Capital Line, Sponsorship and Professional Representation) upon identity verification"

### Supply Distribution

TECHNICAL SPECIFICATIONS		SUPPLY AND DISTRIBUTION	
Official Name	CoinReward	Founders	0%
Ticker	CORE	Team/Advisors	0%
Contribution Parity	1 BridgeCoin (BOIN) = 1 CORE	BridgeCoin Barter Pool	86.2%
Contribution Parity for Donors/Contributors	1 Stablecoin (USDC) = 1 CORE	Donors/Contributors Pool	13.8%
Barter/Swap Policy	1 CoinReward : 2 Bondibill		
Transferability	Non-Transferable (Soulbound)		
Governance	None (Utility/Identity Key/Consumable "gas" credit )		
Total Supply	5,800,000 Fixed (Mint-on-demand)		
Total Donation-Based Manual Release	800,000 Fixed (Mint-on-demand)		
Total Atomic-Barter Supply (1 BOIN : 1 CORE)	5,000,000 Fixed (Mint-on-demand)		
Token Standard	Solana Token-2022 standard with a specific Non-Transferable (Soulbound) extensión		

**Hardware Wallet Compatibility:** CORE is fully compatible with physical hardware wallets (e.g., Ledger, Trezor) via Solana-compatible interfaces. Because CORE is Non-Transferable (Soulbound), users intending to use hardware security MUST perform the initial BOIN-to-CORE barter using their hardware wallet address as the destination.

**Dynamic Utility State:** CORE functions as a "Consumable Utility Credit" for capital line access when the balance is > 1, and as a "Permanent Soulbound Key" when the balance is exactly 1.

## 2.1. Core Utility & Prime Rewards

### 2.2. Entrepreneurial Utility Suite

**Proof-of-Access & The N-1 Burn Mechanic:** To initiate legal onboarding for the Entrepreneurial Utility Suite (Includes **Sponsorship, Professional Representation and a \$200,000 USD Line of Capital**), the holder must demonstrate ownership of the CORE token.

- **Consumable Activation:** When a holder desires to use the Entrepreneurial Utility Suite, the protocol treats CORE as "gas" or a "single-use access permit".
- **The Burn Protocol:** If a holder possesses more than 1 CORE, the system will burn  $\$N-1\$$  tokens to fuel the access. For example, if a holder has 800 CORE, 799 will be burned upon use.
- **Threshold Protection:** If a holder has only 1 CORE, or once a high-balance holder reaches their final token, that last token shifts from a "consumable credit" to a **Permanent Identity Key**. This final token is protected from the capital line burn to ensure the holder maintains permanent access and discount rights.
- **Refueling Access:** Holders may "refuel" their consumable credits at any time by purchasing BOIN in the secondary market and swapping it for additional CORE.

### 2.3. Bondibill Token Release (STR) Discounts

The platform facilitates the acquisition of Security Token that distribute a stream of Income to Holders for +67 years:

- **Standard Exchange:** 1 Bondibill = 1 USDC (Stablecoin).
- **Barter Policy with CORE:** 1 CORE = 2 Bondibills (BNDB)
- **Cash Discount:** 20% flat discount on purchases up to a total of **\$20,000,000 USD**.
- **Restriction:** This 20% discount applies strictly to new capital injections (Stablecoins) and **does not apply** to assets acquired through the Barter Policy.

#### 2.3.1. Bondibill Ecosystem

##### 2.3.1.1. Executive Utility Suite:

- Sponsorship, Professional Representation, Capital (+USD 10 millions) all as inseparable package, exclusively for Bondibill Holders.

##### 2.3.1.2. Passive Income for 67 years

- Monthly Cash distribution for Bondibill Holders

##### 2.3.1.3. Digital Asset Backed with Economic Value

- Assets under management by Bondibill Trust (Securities, Cash, Bullion Gold reserves secured in vaults) are core assets not liquidated and set up to produce legacy passive income to Bondibill holders for over 67 years

##### 2.3.1.4. Net Asset Reports for Economic Value Calculation

- Quarterly and Annual Reports audited by top accounting firms to provide stakeholders the basis for economic value

### 2.3.1.5. Private Banking Capabilities for Network and Global Citizens

- Private Banking to store value and protect users from economic cycles or high leverage banking that may jeopardize the value of deposits and whereas values are limited protected by local agencies. As private banking capabilities become effective is expected a high level of scrutinized activity by local financial authorities and Government. To offer offset operational cost and economy risk as well as aggressive taxation policies imposed by local authorities territories such as British Virgin Islands offer a more productive environment to cover operating expenses and marginal profits. Main services to offer include bank account for Bondibill Holders to develop his own business and wealth creation regardless of where the holder lives or operate.

### 2.3.1.6. Industrial Development

- Bondibill ecosystem expects to deploy resources to facilitate electronic payments and online business or small business to be developed in areas whereas banking services are limited to those with high network qualification. Aiming financial incursion and niche development.

## 2.4. The Barter & Burn Policy

CORE provides a straight path for holders to transition from utility to Security Token with real Utility ecosystem.

- **Barter Ratio:** (execute an automated **1:1 barter** (1 BOIN: 1 CORE) to provide the necessary credits for Entrepreneurial Utility Suite and BNDB ecosystem.
- **Applicability:** This preferential rate applies exclusively to the **Total Supply (5,000,000 CORE)**.
- **The Burn Mechanism:** To ensure a deflationary and non-speculative environment, the smart contract executes a **mandatory burn** function. Once a CORE token is bartered for BNDB Bondibill, it is permanently destroyed.
- **No-Burn Discount Policy:** The "N-1 Burn" is only triggered for Entrepreneurial Utility Suite activation. Accessing discounts on Bondibill releases does **not** consume CORE tokens. However, if a user chooses to swap CORE for BNDB under the 1:2 Barter Policy, the tokens involved in that specific swap are subject to a **Full Burn. Discount & Swap Logic:** The "N-1 Burn" mechanism is **not** activated if the holder is only accessing Bondibill (BNDB) discounts. However, if CORE is explicitly **swapped** for BNDB under the 1:2 Barter Policy, those tokens are subject to a **Full Burn** as they are being converted into a different asset class.
- **Fulfillment Guarantee:** The transition from BridgeCoin (BOIN) to CORE is an "Atomic Barter" executed via Cross-Program Invocation (CPI). This ensures the identity key is generated instantly in the same transaction as the BOIN destruction, removing all manual verification delays and providing a cryptographic guarantee of receipt of the Digital Voucher.

## 2.5. Strategic Barter & Conversion Mechanics (BOIN Integration)

To foster ecosystem interoperability and reward participants within the Solana network, the Bondibill protocol incorporates a native "Barter-to-Bill" swap mechanism. Under this policy, holders of **BridgeCoin (BOIN)**—the official liquid acquisition precursor—are entitled to a fixed-

ratio conversion into **CORE** identity keys, which subsequently unlock BNDB utility. The protocol's Vault architecture is configured to recognize verified **BOIN** burn events and execute an automated **1:1 barter** (1 BOIN : 1 CORE) to provide the necessary credits for BNDB utility or capital access. This conversion is facilitated through a dedicated liquidity bridge within the IDO Vault, ensuring that the **1:2 utility multiplier of the Bondibill Barter Policy** is maintained while providing a seamless entry point for the broader Solana utility community. All BNDB tokens distributed through this barter mechanism are subject to the same immutability standards and reporting frameworks as the primary distribution tranche.

**Utility Finality:** Upon the successful 1:2 swap of CORE for Bondibill (BNDB), the CORE identity key is retired and permanently destroyed. This action signifies the completion of the utility lifecycle, and the wallet will no longer have access to the Entrepreneurial Utility Suite unless a new CORE identity key is acquired.

---

### 3. Technical Architecture & Security.

#### 3.1. Token Architecture (The "Receipt")

*To be implemented on the Solana Blockchain.*

- **Token Name:** CoinReward
- **Symbol:** CORE
- **Token Standard:** **Solana Token-2022 Non-Transferable extension**
- **Non-Transferable Extension:** Enabled. CORE is a "Soulbound" digital receipt/Identity key. It is non-transferable to ensure that the contribution and the subsequent access rights remain tied to the specific verified individual.
- **Issuance Logic:** Atomic "Burn-and-Mint" execution via Cross-Program Invocation (CPI).

##### 3.1.1. Security & Recovery Policy

Because CORE is a "Soulbound" digital receipt utilizing the Solana Token-2022 Non-Transferable extension, it is technically locked to the destination wallet. Contributors are advised that losing access to the private keys of the verified wallet results in the permanent loss of access to the Entrepreneurial Utility Suite (Includes **Sponsorship, Professional Representation and a \$200,000 USD Line of Capital**), as the identity key cannot be re-issued or moved to a different address.

##### 3.1.2. Wallet Finality & Compatibility

Contributors must ensure that the Solana wallet address used during the "Atomic Barter" (BOIN to CORE) is their permanent, secure address. Once CORE is minted, the Token-2022 Non-Transferable extension prevents the token from being moved to any other address—including hardware wallets, secondary Solana wallets, or cross-chain interfaces like MetaMask. The CORE token is permanently bound to the receiving address; therefore, the security of that specific wallet's private keys is the sole responsibility of the holder.

##### 3.1.3. Message to Display on Notification for user on dApp:

On the dApp, right before the user clicks "Barter BOIN for CORE," there shall be a mandatory checkbox that says:

- *"I understand that CORE is Non-Transferable and will be permanently locked to this specific wallet address. I confirm I have backed up my recovery phrase for this wallet."*

### 3.2. Multi-Wallet Onboarding Workflow

The user simply buys BOIN on Raydium on the dApp and barter it for CORE.

### 3.3. Compliance & Buyer Identification

The legal mechanism for Entrepreneurial Utility Suite (Includes **Sponsorship, Professional Representation and a \$200,000 USD Line of Capital**).

**Identification Policy:** To activate the Entrepreneurial Utility Suite (Includes **Sponsorship, Professional Representation and a \$200,000 USD Line of Capital**), the holder must provide a **Government-issued ID**.

**Legal Purpose:** This identification is required so that company lawyers can identify the "Buyer Party" in future private security purchase agreements funded by the Capital Line and legal representation or commercial contracts preparation.

**Asset Status:** The CORE token is strictly a **Identity key** and is not pledged to physical gold or cash reserves.

**AML Standards:** Verification ensures that all participants in the CoinReward ecosystem are identified and vetted for regulatory compliance.

---

## 4. Team & Long-term Vesting

*Avallti: An Independent Investment Group, founders and management team recopiled over 150 years of experience in the healthcare industry and operaton management*

*Author: Young Grasshopper - QLP (The Quantum Leap Practitioner)*

## 5. Compliance, Reporting & Trust-by-Code Integration

**5.1 The Unified Transparency Ledger:** In alignment with the "Trust-by-Code" philosophy, the issuance and lifecycle of every CORE token are recorded on the **Global State Account** within the Solana ledger. This ensures that the conversion from BridgeCoin (BOIN) to CORE is public, immutable, and verifiable by any participant through the **BOIN Utility Portal (dApp)**.

**5.2 Automated Audit Synchronization:** The CORE token serves as the primary **"Identity Key"** for the ecosystem's compliance framework. Its status is directly linked to the protocol's rigorous audit schedule:

- **Proof of Reserve:** The dApp dashboard provides real-time visualization of the 74% Liquidity Depth and 10% Compliance Escrow, ensuring the CORE "Identity Key" always points to a fully collateralized and audited environment.
- **Milestone-Based Reporting:** Every 90 days, the protocol publishes **Quarterly Transparency Reports**. The successful publication of these reports is a technical

prerequisite for the smart contract to release operational funds, directly protecting the long-term utility value for CORE holders

**5.3 Buyer Identification & Regulatory Alignment:** To activate the Entrepreneurial Utility Suite (Includes **Sponsorship, Professional Representation and a \$200,000 USD Line of Capital**), the holder must maintain a minimum balance of **at least 1 CORE**. This final token acts as the permanent "key" for company lawyers to identify the "Buyer Party" in legal agreements, even after all other "gas" tokens have been consumed. This ensures that the "Buyer Party" in future private security agreements is legally identified and vetted, satisfying global regulatory standards for private capital transactions while maintaining the efficiency of blockchain-based verification. Holding 1 CORE satisfies the on-chain requirement; however, the legal activation of the Capital Line is triggered by the completion of identity verification (KYC/AML) through the BOIN Utility Portal. This process converts the on-chain identity key into a legally recognized "Buyer Party" status for private security agreements.

## 6. Roadmap

### 6.1. CoinReward Roadmap

*Official development stages.*

- **Step 1:** Collect Proceeds & Release CORE on Demand
- **Step 2:** Legal Structure and Establish Banking Relationships.
- **Step 3:** Entrepreneurial Utility Suite: Immediate Functional Utility & Activation Threshold
- **Step 4:** Publish Transactions closed in CoinReward Ecosystem.
- **Step 5:** Bondbill Barter Activation & Community consolidation

---

## 7. Legal Disclaimer

The **CoinReward (CORE)** token is a non-transferable and Identity Key and acts also as "gas" or "Consumable Credit" the Holder obtains via BridgeCoin (BOIN) release or Donations/Contribution. **CORE** is not a security, is not pledged to physical assets, and does not represent an ownership stake in any trust or company or reserve, it does represent the right of income distribution or profit sharing. Is a Identity Key to activate the Entrepreneurial Utility Suite (Includes **Sponsorship, Professional Representation and a \$200,000 USD Line of Capital**), is governed by off-chain company policy and is contingent upon the successful completion of identity verification (KYC). Identification provided by the holder is used solely to identify the legal "Buyer Party" for private transactions; the **CORE** token itself serves only as a functional "Identity key" to access these services as bungle package.

The "N-1 Burn" mechanic is a blockchain-enforced administrative consumption of utility credits for service activation and does not constitute a financial fee or a loss of identity-based access rights, provided the 1 CORE threshold is maintained.

Here is the essential disclosure components to potential buyers.

Please acknowledge the following:

- **No Registration:** The tokens offered herein have **not been registered** under the U.S. Securities Act of 1933, as amended, or the securities laws of any other jurisdiction.

- **Exempt Offering:** This offering is being conducted pursuant to exemptions provided by **Rule 506(c) of Regulation D** and **Regulation S**.
- **Restricted Transfer:** These tokens are "restricted securities" as defined by Rule 144. They may not be offered, sold, pledged, or otherwise transferred to any **U.S. Person** (as defined in Regulation S) for a period of at least **one year** from the date of issuance, unless registered or an exemption applies.
- **Verification Required:** All U.S. participants must be "Accredited Investors" and are subject to third-party verification. Non-U.S. participants must certify they are not "U.S. Persons."
